Frontend Developer

Hello, thank you for taking the time out of your busy day to read my qualifications. I am an enthusiastic web developer, I have been programming for 2 years, I am an avid student of programming who has gone through a wide variant of course work, 'freeCodeCamp' 'Coursera' And many other resources such as learning from my fellow peers, all that... has molded me into the passion driven programmer I am today. Over the course of my coding journey, I have completed several projects of which have unquestionably taught me many things and challenge me each day, I spent countless nights in front of the screen, writing, debugging, more debugging, solving problems, going to bed just to dream about solving the next programmatic challenge, and waking up and doing it all over again. I have experience with HTML/CSS, JavaScript, Python, mongodb, React, node.js, I have just recently built a social media app that was a ton of fun working on, I have tons of ideas for implementing awesome features that make the lives better for people. I want to work with a bright, ambitious, talented team, whom I could learn from and challenge myself daily by solving the problems that enrich the lives of us all. I am a lifelong student, always learning new and interesting things. I am passionate about solving problems, helping people, being apart of something great, greater than myself. Making a difference and solving problems that will make the lives of us all easier are all things that motivate me.

Within my portfolio you will see not only the numerous projects I have worked on, the thought and effort I put in, the passion I have for my craft, the overall love I have for this field, and all that I have learned over the past couple of years even astounds me. I am grateful for making the career change and await to join a phenomenal team. I continue to strive, learn, and hope to turn my skills into a Full-Stack Dev role. I have several certificates from my completed coursework, to which I am proud of, I am committed to the realm of programming, and I am eager to bring value to you and our team.

Skills

- ★ Web Development
 - ★ MySQL
 - ★ HTML
 - ★ CSS
- ★ JavaScript
 - ★ UX/UI
 - ★ Python

★ Mongoose

★ Express

★ React

★ Node

★ Git – Version Control

★ Great communication skills

★ Detail oriented

★ Analytical thinking

★ Trouble shooter

★ Teamwork

Past Professional Summary

Reliable and Enthusiastic IT Professional with over 10 years of experience in working with computers, technology, software, hardware, and helping clients resolve their computer and technical needs, Customer service is key. I possess tier 1-2 troubleshooting skills for a wide variety of problems, When I'm not working, I spend some additional time on the computer taking on various projects. All of which involve increasing my knowledge and helping others where I can. This is something I am most passionate about, "learning", I'm very passionate about "Information Technology" and "Helping others" I am eager to join a phenomenal Organization, I have extensive knowledge of software, hardware, and web applications. I am also proficient in Windows 7-11 / (windows server) active directory, Linux, anything I don't know - I do my research and learn it.
